TRAINING DESCRIPTION

This course covers all aspects of printing models, operations and user-maintenance procedures necessary for achieving optimum results from your 3D printer. It combines hands-on sessions with teacher lead instruction.

OBJECTIVE OF THIS TRAINING

By the end of this course, participants will be able to:

- Familiarize with the contents of the system user guide
- Understand safety precautions and procedures
- Understand more about the different materials and consumables
- Properly operate the FDM 3D Printing system including material replacement & tip/print head replacement
- Calibrate the system and perform basic maintenance procedures

PREREQUISITES

- None
